

April 3, 2004  
Historic Preservation Commission

The Ellis family would like to try and move an adobe house and redwood guest house at the south west corner of Cattle Track and Lincoln Drive. The houses were designed and built by George Ellis in the 1940's. The lot will be split and the structures moved or demolished by the end of May 2004. We want to try and move both structures to 105 Cattle Track which is zoned H.P. S. C. Historic Property, Special Campus. The property is listed on the National Register of Historic Places and has other Ellis designed and built structures. This will be a delicate endeavor and we are not sure all pieces will survive the move. We think the move will be in four sections. The total square footage will depend on the success of the move. We estimate the square footage to be 2530. When the move is complete and we know the exact square footage it should be deducted from the total square footage allowed on our site. We plan to restore the buildings and make them an integral part of the property.

Thanks for your consideration,

A handwritten signature in cursive script, appearing to read "Sam Ellis", with a long, sweeping underline that extends to the left.
